## SKILLS

- TypeScript
- React
- Kotlin
- React Native
- Next.js
- Redux
- Tailwind CSS
- Sass CSS
- Node.js
- Express
- Claude
- Cursor
- Paperclip.io
- Git
- GitHub Actions

## EDUCATION

2009-2013  
**ARIZONA STATE UNIVERSITY**

- Bachelor's in Biology

2018-2019  
**DEV MOUNTAIN**

- Full Stack Developer

## WORK EXPERIENCE

### American Autonomy

January 2025 - Present

Software Engineer

- Build end-to-end features across AcreConnect and an agricultural drone operations platform using React, TypeScript, Kotlin, and PostgreSQL.
- Expanded beyond a frontend specialization into backend development, contributing to Kotlin services, PostgreSQL data models, APIs, and integration tests.
- Lead, coordinate, and facilitate engineering meetings to improve team alignment, clarify decisions, and ensure clear ownership of next steps.
- Drive feature planning for select initiatives, working with product and engineering to clarify requirements, define scope, and write actionable Jira stories.
- Collaborate on building AI-assisted engineering workflows including a tool that converts PRDs into structured Jira epics and stories, reducing ticket-writing time and planning.

### WebPT

August 2022 - December 2024

Software Engineer

- Contributed to the development of SOAP Notes 2.0, building React and TypeScript user interfaces and scalable Node.js, Express, and SQL services for a modern healthcare platform.
- Earned 3rd place in a company-wide hackathon by building real-time collaborative patient form editing with WebSockets, enabling multiple clinicians to edit the same form simultaneously.
- Increased unit and integration test coverage from 45% to 75% by identifying testing gaps and writing comprehensive Jest test suites, improving code quality and reducing regressions.

### PetSmart

December 2018 - July 2022

Software Engineer

- Built and launched the PetSmart mobile e-commerce app as part of a 3-person React Native team, integrating with iOS, and Android.
- Drove the creation of a design system with reusable UI components and documentation that improved consistency and development speed.
- Mentored engineers through the team's formal mentorship program.
- Recognized with the team's MVP Award for versatility across web, React Native, and native mobile development.

### STYR Labs

April 2018 - November 2018

Software Engineer

- Designed and built a mobile nutrition and pregnancy tracking app in React Native from idea to production with a 5-person startup team, owning UX/UI design.
