SKILLS

Frontend

React, React Native, Typescript, Redux, Tailwind CSS, Sass, Responsive UI

Backend and APIs

Node.js, Express, Kotlin, REST, PostgreSQL, SQL, WebSockets

Design

UX/UI Design, Figma, Design Systems, Reusable Components, UI Prototyping

AI tooling

Claude, Claude Code, Cursor, Paperclip.io

EDUCATION

2009-2013

ARIZONA STATE UNIVERSITY

- Bachelor's in Biology

2017-2018

DEV MOUNTAIN

- Full Stack Developer

VOLUNTEER

HIGH DESERT VOLLEYBALL ASSOCIATION

- Social Media, Web and Marketing Committee Chair

WORK EXPERIENCE

American Autonomy

January 2025 - Present

Software Engineer

- Own the design and development of features across AcreConnect and an agricultural drone operations platform, translating complex workflows into intuitive interfaces using React and TypeScript.
- Lead features from requirements through UX/UI design, frontend implementation, backend integration, testing, and production delivery.
- Collaborate on Kotlin services, PostgreSQL data models, and APIs to deliver cohesive, end-to-end product experiences.
- Drive feature planning by clarifying ambiguous requirements, defining scope, making technical tradeoffs, and translating product needs into actionable engineering stories.
- Develop AI-assisted engineering workflows using Claude Code and Paperclip.io to accelerate planning, implementation, and testing while maintaining code quality.

WebPT

August 2022 - December 2024

Software Engineer

- Contributed to the development of SOAP Notes 2.0, building React and TypeScript user interfaces and scalable Node.js, Express, and SQL services for a modern healthcare platform.
- Earned 3rd place in a company-wide hackathon by building real-time collaborative patient form editing with WebSockets, enabling multiple clinicians to edit the same form simultaneously.
- Increased unit and integration test coverage from 45% to 75% by identifying testing gaps and writing comprehensive Jest test suites, improving code quality and reducing regressions.

PetSmart

December 2018 - July 2022

Software Engineer

- Drove the development of a reusable UI component library and design system, establishing consistent interface patterns and improving development efficiency.
- Built and launched PetSmart's iOS and Android e-commerce application as part of a three-person React Native engineering team.
- Implemented customer-facing features including Apple Pay, curbside pickup, delivery integrations, and loyalty experiences.
- Mentored engineers through the formal mentorship program and received the team's MVP Award for versatility across web and mobile engineering.

STYR Labs

April 2018 - November 2018

Software Engineer

- Owned UX/UI design and React Native development for a mobile nutrition and pregnancy tracking application, taking the product from concept to production on a five-person startup team.
